## *Summary*

➢ Total **3.0 years** of IT experience in **Robotic Process Automation (RPA) using UiPath and ABBYY Developer, JAVA and Support**.

➢ **UiPath Advance Certification completed.**

➢ **RPA Developer SAP Automation Training**

➢ Experienced in building Robotic Automation Processes and Business Objects for various business systems.

➢ Experience in Development, Testing and Deployment of bots using **UiPath**.

➢ Experience in creating process flows using **UiPath Studio, UiPath Robot and Orchestrator in UiPath.**

➢ Created end to end automation solutions for clients as per requirement which involves feasibility study, development, testing and deployment.

➢ Worked with Web base application and Windows application automation using UiPath.

➢ Involved in identifying opportunities to automate manual tasks using Robotics Process Automation technology.

➢ Fetching the input data from the various Sources like reading the data from Outlook, Excel and PDF files into the UiPath.

➢ Used UiPath Credential Manager for maintaining, securing and retrieving the user credentials through UiPath Orchestrator.

➢ Worked with mainframe, windows, web application and CITRIX automation end-to-end process automation using UiPath.

➢ Worked with **OCR and ICR** for designing in UiPath studio.

➢ Experience in managing robot's workloads using UiPath.

➢ Provided Exception handling at every possible scenario for a robust error-free development.

➢ Ensures reusable components are designed & developed where applicable.

➢ Created **POC's** using UI Path for tool comparison.

➢ Communicating with UiPath on software related issues, suggested improvements and participating with other users in the UiPath community.

➢ Designed solutions utilizing RPA best practices and maintain technical responsibility for project delivery.

➢ Reviewed & fixed Business Process Production issues using UiPath.

➢ Knowledge of applying Breakpoints and debugging techniques in UiPath.

➢ Post-execution review of test cases for completeness, accuracy and adherence to policies, procedures and defining protocols.

➢ Automating data transfers including importing and exporting data between applications or files.

➢ Extensively worked on debugging application for fixing bugs and Production support.

➢ Worked on Queue Configurations, Asset Configurations, Monitoring, Exception handling, and efficient use of stages, data types, and environmental variables for processing of Process.

➢ Acknowledge on other RPA tools like **Automation Anywhere, Blue Prism.**

➢ Good understanding of SDLC methodologies like waterfall and agile.

➢ Highly motivated with the ability to work effectively in teams as well as independently.

➢ Team player with excellent interpersonal skills, self-motivated and dedicated.

## Technical Skills

| | | |
|---|---|---|
| RPA Development Tool | : | UiPath Studio, UiPath Robot, UiPath Orchestrator, ABBYY Flexi capture |
| Languages | : | VB.NET, SQL, Core Java, HTML5, CSS3, Bootstrap, JavaScript. |
| Operating Systems | : | Windows, Linux. |

## Experience

**1)RPA Developer** :- May 2021 to Till date**.**

**Company:** **Jade global**

**Projects**: **Invoice Data extraction downloading and uploading into Oracle (Migration Script)**:

**Description**: Using Uipath activity every invoice data extracted and downloaded that invoice and took screenshot of that invoice.

**Using** Oracle application uploaded that screenshot and file into Oracle

➢ Implemented End to End **Robotic Process Automation** (RPA) using **UiPath, Oracle**.

➢ Experience in Development, Testing and Deployment of bots using **UiPath**.

➢ Post-execution review of test cases for completeness, accuracy and adherence to policies, procedures and defining protocols.

➢ Automating data transfers including importing and exporting data between applications or files.

➢ Highly motivated with the ability to work effectively in teams as well as independently.

➢ Team player with excellent interpersonal skills, self-motivated and dedicated.

**Responsibilities**: Responsible for Design and Developed BOT For Oracle application as per requirement .

**Environment**: UiPath Studio, UiPath Robot, Orchestrator, MS Excel, Oracle

**2) Company:  Smartbooqing**

**Role**:Abbyy Developer

**Duration:- Feb 2021 to April 2021**

**Projects: Template Definition.**

**Description**:      Using Abbyy flexicapture define template and extracted data using abbyy flexicapture 12.

**Responsibilities**: Responsible for Define template For Abbyy as per requirement of Structure data.

**Environment**:      Abbyy Flexicapture 12, UiPath Studio, UiPath Robot, Orchestrator, MS Excel

**3) RPA Developer** 01-July-2019 to 30-June-2020**.**
 **Rabbit and Tortoise Technology Solutions.**

**Environment:** Robotics Process Automation- UiPath, VB.Net
**Responsibilities:**

➢ Implemented End to End **Robotic Process Automation** (RPA) using **UiPath**.

➢ Used UiPath automation elements such as Mouse, Keyboard and Attribute to automate the desktop sequence activities.

➢ Implemented selectors for interacting with window and web browsers for continuous navigation of applications.

➢ Image-based texts in applications are also automated with mouse clicks.

➢ Used Screen Scraping method to extract text from running window application by appropriate output methods such as native, Full text and OCR.

➢ Implemented Web Recorder for automating logging and inserting data actions into browser applications using different Input methods such as Send window messages and Simulate.

➢ Configuring new processes and activities using core workflow principles that are efficient, well-structured and manageable.

➢ Used Data Scraping method for extracting structured data from browser applications or documents into a CSV file or Excel Spread sheet.

➢ Used image activities with wait conditions to ensure proper website or application loading, to Perform certain actions in a loop.

➢ Used Excel automation for repetitive Excel data entry, appending and for comparing columns.

➢ Interacted with different mail services such as POP3, OUTLOOK and IMAP to get the mail messages into folder.

➢ Interacted with the different send services of mail to send automatic mails and audit logs regarding the task completion.

➢ Handled exceptions using Try-Catch activity.

➢ Image based, and Text automation are used in Virtual Environments, for interacting with the application

➢ Handled the Execution of project in UiPath Robot.

➢ Deployed the process in UiPath Orchestrator and scheduled their execution.

➢ Used Queues to collect information from orchestrator to perform additional tasks.

➢ Configured the Bots and deploying processes and scheduled the jobs in UiPath Orchestrator.

| Organization | Role | Duration |
|---|---|---|
| ➢ Jade global (Pune) | **Uipath Developer** | May.2021 to till date. |
| ➢ Smartbooqing (Pune) | **ABBYY Developer** | Feb.2021 to April 2021. |
| ➢ Rabbit and Tortoise Technology Solutions. (Pune) | **RPA Developer** | Jul. 2019- Jun.2020. |
| ➢ MD India Pvt LTD. (Pune) | **Support Executive** | Sep. 2018- Jun.2019 |
| ➢ Technoflame India PVT LTD. (Latur) | **Web Developer** | Dec. 2016- May.2017 |

*Professional Experience* *Rabbit and Tortoise Technology Solutions*                              *Jul. 2019 – Jun 2020*

**Project**:          **S&G and BVK for All Route OTC Code Generation (ATM Machine).**

**Role**:          RPA Developer.

**Description**:          S&G is intended to help Generate OTC code for ATM ID with respect to their custodian member and          BVK is intended to provide OTC code service through BVK app to custodian contact number.

**Responsibilities**: Design and Developed POC for Every Route and verify the generated OTC code is reached on a custodian member or not.

Developing the BOT for S&G and BVK using RE framework.

Executed BOT against functional specifications.

Process Library Development.

Generated Report for every ATM ID and by using S&G OTC code which is generated by BOT. **Environment**: UiPath Studio, UiPath Robot, Orchestrator, MS Excel

*Professional Experience* *Rabbit and Tortoise Technology Solutions*                              *Jul. 2019 – Dec 2019*

**Projects**:          **SAP System for Vender Invoice Management. Role**: RPA Developer

**Description**:          The SAP system is intended to help maintenance to every invoice data extract and matching with given master data, then generated structure data enter into SAP System and to produce

Analytical reports. Reports like response times report Incident to log report.

By using Text Communication, sending bulk email.

To maintain day to day activities, activity log is used.

Lost & Found module is used to help customers to get claim their lost things.

**Responsibilities**: Responsible for Design and Developed BOT For SAP system as per requirement of Structure data.

**Environment**:          UiPath Studio, UiPath Robot, Orchestrator, MS Excel

## Education

Master of Computer Application (SRTMU, Nanded University)

Shri. Bidwe College Of Engineering, Latur.
