Objectives

To search for a position that will allow me to improve my current programming, communication and teamwork skills as well as contribute to the organization's goals. From this position, I also seek the opportunity to learn new skills for future use.

Education

UNIVERSITI MALAYSIA SARAWAK (UNIMAS) (2014-2018)

- Bachelor of Computer Science and Information Technology (Software Engineering).
- CGPA 3.20

Skills

- Programming language: PHP, HTML, CSS, JavaScript, JQuery, MySQL, C#, C++, Java, SQL, Prolog, Oracle Database, Laravel Framework, Vue.js, Node.js, Express Framework
- Good Communication skill in writing and spoken in English and Bahasa Melayu.
- Able to work in both individual and team situations.

Experiences

Epost Holding Sdn. Bhd. (January 2022 – March 2022)

- I am currently employed as a back-end developer since January 2022. My responsibility is to develop the back end of the system based on Express Framework and Node.js. I am involved in the Warehouse Management System (WMS) and Order Management System (OMS).

EasyStore Commerce Sdn. Bhd. (June 2021 – January 2022)

- I am currently employed as a software engineer since June 2021. My responsibility is to enhance the front end of the system based on Laravel Framework and Vue.js. I am involved in the EasyStore E-Commerce Website.

Heitech Padu Berhad (Heitech) (June 2020 – June 2021)

- I have been employed as a software developer since June 2020. My responsibility is to develop the back end of the system based on the Laravel Framework. I am involved in Benefits Automated Management Systems (BeAMS). BeAMS systems will be used by the Perkeso staff.

Vista Kencana Sdn Bhd (VKSB) (July 2018 – June 2020)

- I was employed as a programmer from July 2018. My responsibility is to develop a system based on Laravel Framework. There are two projects that I was involved with when working in VKSB:

1. DBKL Core System (DCS) (October 2018 – June 2020)

Involved in development of DCS project for DBKL. DCS is a system leading integrated system comprising Revenue Management System, Financial System and Human Resource Management System. DCS is the main system that will be used by all DBKL staff. This system is using the Laravel Framework and the programming languages are PHP, JavaScript, CSS, etc. In this DCS project I am responsible for 2 out of 17 modules which are Jualan Aset Hartanah and Jualan Perumahan. I complete all the transactions in these 2 modules in both frontend and backend as well as the database and integration with other systems

2. Human Resource Management System (HRMS) (July 2018-September 2018)

Develop HRMS for company internal used by using Laravel framework and the programming language are php, JavaScript, CSS and etc. I am responsible for this system individually and responsible for completing it.

Universiti Malaysia Sarawak (UNIMAS) (September 2014 – June 2018)

- I am studying Software Engineering at UNIMAS. There are several projects that I am involved in when studying at UNIMAS:

1. Final Year Project (September 2017- June 2018)

Design and develop a web-based system named Small and Medium Enterprise System Template (SMEST) for the Ministry of Agriculture and Agro-based Industry to manage information and activities made by their sponsored SME entrepreneurs.

2. Kuramae IoT Competition (2015)

Lead my team in the Kuramae IoT Competition in developing Food Ordering with Raspberry Pi 3 and iBeacon.
