SENIOR SYSTEM ANALYST

July 2019 – Running

Heitech Padu Berhad, Subang Jaya, Selangor.

I was assigned as a system analyst for **myIMMs Maintenance** project. This project is purposely doing a maintenance on myIMMs Application for Jabatan Imigresen Malaysia located JIM Putrajaya (HQ). Agile development methodology has been used in this project.

- Troubleshooting Passport & Travel Document and Security modules logs
- Assign to assist module owner of User ID Management Module and Stock Control
- Assign to handle Security module of myIMMs application
- Prepare Software Requirement Specifications and Software Design Document
- Prepare Test Script for user acceptance testing
- Prepare deployment & implementation process of myIMMs application
- Prepare SQL script for stakeholder and client usage
- Assist software developer with business flow and logic program
- Test the system effectiveness before deployment process

JUNIOR SYSTEM ANALYST

Nov 2016 – June 2019

Heitech Padu Berhad, Subang Jaya, Selangor.

I was assigned as a system analyst for **myIMMs Transformation** project. This project applied reverse engineering approach to transform desktop application to web-based application using .Net framework for Jabatan Imigresen Malaysia located JIM Putrajaya (HQ).

- Involved in Reverse Engineering Project which involved Project Planning, analysis through identifying the age old business rules from the stand alone application coded in C++ and COBOL, identifying the data services to use to the newly created web based using .Net Framework and utilities to build with WAS, Web Services and Z Connect.
- Involved in software development life cycle and defect resolution processes.
- Defined applications problem by consulting with clients to evaluate procedures and processes.
- Tested programs to validate results.
- Assisted in the post implementation troubleshooting of new applications and applications upgrade.
- Involved from planning till implementation.
- Worked in Agile environment
- Engaged in reviews with team members (senior system analyst, software developer, stakeholders, testers).
- Produce System Requirement Specification and Software Design Documentation.
- Worked collaboratively with the Business Analyst team to refine the requirements through story boarding.
- Involved in testing phase including SIT and UAT session with user.
