- Manage change project implementation until completion and hand-over to mass production / operation teams.
- Develops PO (production, wholesales, retail) to meet company budget in conjunction with Sales, Marketing, Finance and make a presentation to Country CEO, Region SCM Head.
- Analyze order volume, order backlog status, late order status and inventory levels as well as make recommendations and take related actions to enable lead time, late order, inventory and labor budget goals to be met
- Manage the inventory control function and related activities to ensure that production and shipping targets are achieved.
- To ensure compliance with the principles and rules of the Internal Control System and related laws, select and make a contract with a service provider taking cost and efficiency into consideration, and monitor their work and manage registration process
- Design most efficient operational flow with best in cost solution

Supply Chain Supplier Development

- Audit suppliers and support in development of/compliance to Supply Chain activities/requirements ensuring Launch readiness & smooth supplies during operations, incl. Internal Coordination with Launch CFT (Program Purchase, Supply Chain Project, etc).
- Assess suppliers on minimum Supply Chain capabilities & support Purchase/CFT on sourcing decisions
- Supply Chain Crisis Management, supporting continuity of shipments from suppliers by onsite assessment & CFT engagement
- Evaluate suppliers on MMOG/LE capabilities and complete MMOG/LE endorsement
- Supplier SCM process improvements & standardization, Work closely with suppliers for Supply Chain process enhancement & continuous improvements.

Key Achievements:

- "Spearheaded the design, implementation, and handover of critical supply chain projects, resulting in a 20% reduction in operational costs".
- "Enhanced inventory accuracy to 85% by implementing robust cycle counting procedures and leveraging SAP for improved SKU tracking, significantly reducing discrepancies and stockouts."
- "Established a supplier performance evaluation system DPPI and DPMO approach that enhanced supplier reliability by 95% and ensured compliance with global quality and delivery standards."
- "Spearheaded complex supply chain transformation projects from conception to completion, IT digitalization upgrades, sourcing localization on time and within budget, with a direct impact on supply chain resilience."

CURRICULUM VITAE

Aug 2022 – Aug 2023

Supply Chain Manager

Robert Bosch (M) Sdn Bhd | Penang, Malaysia

Industry	Electrical & Electronics
Specialization	Manufacturing/Supply Chain Operations
Role	Management

Physical Logistics Operation:

- Leading a group of executive, officers, and warehouse team in running daily operations
- Operate and optimize materials flow from all warehouses
- Responsible to meet related safety standard and train all operators to follow the standard.
- Review and follow up to revise time to time ISO/ SOP/ instruction card
- Drive good team morals and install discipline among subordinates.
- Communicate company policies to the team
- Participate in lean line design and propose suitable material supply concept
- Create and update PDCA, target chart for Logistics Projects.
- Lead on the logistics topic for plant remodeling or interplant support.
- Driving the logistics team to implement i4.0 or digitalization projects

Supply Chain & Material Planning:

- Plan & organize the logistics department budget according to the BP.
- Resource/Capacity planning to meet Business Plan requirement. Unlimited to supply chain services, inventory control, or critical parts availability, import export and shipping activities.
- Develops and implements logistics plans, budgets, and procedures to maximize compliance with customer requires within budget constraints.
- Coordinate workshops and conducting training for new improvement processes in SAP, Projects, or new systems.
- Monitor key point Indicator (KPI) reports and ensuring all KPI's
- Selects, develops, and evaluates personnel to ensure the efficient operation
- Coordinate and support on all issues related to ERP and in-house system.
- Plan for conceptual and execution Logistics Strategy.
- Execution of standardization of Logistics Global directive.

Key Achievements:

- Reduced lead times by 15% and achieved a 25% improvement in logistics efficiency by implementing standardized processes and digital solutions.

April 2014 – July 2022

Regional Logistics SEAIP, Supply Chain Project Manager, Deputy Head of Logistics Manager SEAIP.

ZF Group | Bangkok, Thailand

Industry	Automobile
Specialization	Logistics/Supply Chain
Role	Management

- Monthly KPI reporting for Regional SEAIP plant including the collection of the data, consistency check, data tracking and preparation of reports, preparation of special evaluations, and special reports on request.
- Provide expert knowledge of KPI calculation and tools used for the calculation, work with global team on improvements of the tools and process for the KPI calculation.
- Define and support activities to optimize the supplier delivery performance (DPI, DPO, and ITR) and the communication with the suppliers regarding the challenges in the supply chain.

CURRICULUM VITAE

- Calculation of Logistics costs and development of logistic concepts for acquisition projects.
- Support the acquisition of projects and the implementation of new projects for Green Field (New plant set up) and Brown Field (Existing series production) set up in logistics concept in the region.
- Support any special projects within the plant / regional that require cross-departmental / cross-functional coordination (e.g. with IT or also in shop-floor level). Take part are regular project meetings with regional responsibility and project meetings in Germany.
- Continuous improvement projects and standardization processes across the regional logistics network.
- Manage the regional logistics network and develop as well as implement regional and ZF strategic objectives. Drive and monitor continuous improvement in regional logistics operations.
- Develop strategic logistics plan to support commercial improvement & growth plans.
- Drive and provide a lead for continuous improvement projects and standardization processes across the regional logistics network.
- Optimization logistics processes and follow up on topics, drive new direction set up for the resources planning in logistics.
- Project timeline preparation and logistics execution.
- Develop packaging concept for one-way packaging and returnable packaging with suppliers and customers for the release.
- SAP business module execution process for MM / PP / SD and warehouse management.

Key Achievements:

- Successfully launched continuous improvement initiatives, reducing logistics costs by 18% across the regional network.

May 2009 - Mac 2014

Logistics & Production Control Executive

Yokowo Electronic (M) Sdn Bhd | Kedah, Malaysia

Industry	Electrical & Electronics
Specialization	Manufacturing/Production Operations
Role	Management

- Monitoring SAP transaction PP module and data entry into SAP System.
- Leader for master data (material master, bill of material, product group, and planning data) maintenance and controlling into SAP system.
- Involve monthly and yearly inventory stock check for material control, manufacturing, and finish good warehouse.
- Perform stock correction adjustment.
- Make up and summarize the schedule based on PSI (Inventory, Sales, Production) and business trends.
- Follow up on daily production achievement and production forecast
- Parts movement monitoring, mainly involving NPI, ECN, and DCN.
- Summarize and distribute PSI document, business plan.
- Checking and controlling dead stock by monitoring production achievement reports.
- Make its production scheduling.
- Co-ordinate NPI model and product transfer also follow meeting new model.
- Control Inventory and due stock correction.
- Understanding MPS and MRP movement.
- Invoicing
- Handle sub con purchase part and material.
- Control purchase order for indirect material which BOM.
- Coordinate part approval between all sections.
- Control cost down sub con pricing.

CURRICULUM VITAE

- Communicate with customer for shipment to meet date customer requirement.

Key Achievements:

- Streamlined production scheduling, which led to a 10% increase in on-time

Education

1996	Mara Technical Institute Professional Certificate in Engineering (Others) Malaysia Certificate of City & Guilds of London Institute – United Kingdom
	Major Automotive Engineering Grade Grade A/1st Class

Project Achievement

2014 - 2015	Logistics Project Team – Greenfield Set-up ZF Chennai, India
2015	Logistics project acquisition – BMW Model (G12, F48, G30) Logistics project acquisition – Volvo Malaysia
2016	Logistics Project Lead – BMW Model (G12, F48, G30) Malaysia /Thailand Logistics project acquisition – Daimler, Pekan
2017 -2020	Logistics project acquisition – BMW Model (F15 Export Business) Logistics project acquisition – Daimler Model (C257) Logistics project acquisition – Daimler Model (W167 Tuscaloosa) Thailand Logistics Project Lead – BMW Model (G0x Successor Model) Thailand Logistics Project Lead – BMW Model (G05/G06 ACFTA) Thailand & Malaysia Logistics Project Lead – BMW Model (Local Powertrain) Thailand Logistics Project Lead – Daimler Model (W167 Tuscaloosa) Thailand Logistics Project Team – Greenfield Set- up ZF Pekan, Malaysia Logistics Project Lead – BMW Model (F44/G07/G28) Thailand
2021	Logistics project acquisition – Changan Automotive (SUV) Corner Assembly Logistics project acquisition – BMW Model (G60,G70,U11) Malaysia / Thailand / India
2022 -2023	Supply Chain Project i4.0 Digitalization – Dynamic Supermarket , Inbound RFID , e-Kanban , Receiving Time Window (RTW) Surface Optimization , Robotic Process Automation (RPA)
2023 - Present	Supply Chain Project Industrialization ASEAN – Pougeut 2008 , 3008 , 5008 ,P48 Landtrex – Leapmotor C10

Skills

Advance	Project Management [PMO]
Intermediate	SAP System, Microsoft Project, Value Stream Design & Analysis, Lean Assessment & Production Systems, Global Supply Chain, ISO 13485:2003 /FDA Part 820 QS, Global Logistics Qualification, Logistics Strategy, Visual Management, Logistics Line Balancing, Logistics Cost Analysis. Six Sigma Yellow Belt , WMS
Basic	5'S' Auditor, 8D Problem Solving Methodologies, ISO/TS 16949, FMEA
