Work Experience

Assunta Hospital, Petaling Jaya

Staff Nurse – HDU I 2019 – Present

- Provide holistic nursing care in a 13-bedded High Dependency Unit, catering to critically ill patients requiring close monitoring and advanced interventions.
- Perform continuous cardiac and hemodynamic monitoring, early recognition of patient deterioration, and timely escalation of care.
- Assist in managing patients with acute coronary syndromes, arrhythmias, and post-cardiac interventions (PCI, angioplasty, pacemaker insertions).
- Proficient in advanced airway and respiratory management, including ventilators (NIV, HFNC), tracheostomy care, and oxygen therapy.
- Deliver expert nursing care for patients on vasoactive infusions, PCA, and post-operative monitoring.
- Collaborate with cardiologists, intensivists, and multidisciplinary teams to ensure optimal patient outcomes.
- Uphold strict infection control practices and ensure a safe, high-standard patient care environment.
- Mentor and guide junior nurses, fostering continuous professional development.

Equipment Used:

- Cardiac monitors, defibrillators & infusion pumps
 - Ventilators (NIV & HFNC) and tracheostomy sets
 - Arterial line & central venous pressure (CVP) monitoring devices
 - Syringe drivers and PCA pumps
-

Technical Skills

- Cardiogenic and hypovolemic shock treatment
